Commentary

1. **Home** Menu (as it appears)
   This menu needs to change. It needs to be either "**Our Company**" or "**About Us**". Our Company being the most preferred.

   The submenu shown below needs to reflect three main aspects of a company.

   a. Our Company
      - Who We Are
      - Our Philosophy
      - Our People
      - Why Nexsate
      - Our Parter

   b. Our Work
      - What We Do
      - How We Work
      - Who We Serve
      - Our Expertise
      - Customers Success

   c. People and Impact
      - Careers
      - Innovation & Research
      - Communities Impact
      - Corporate Responsibility

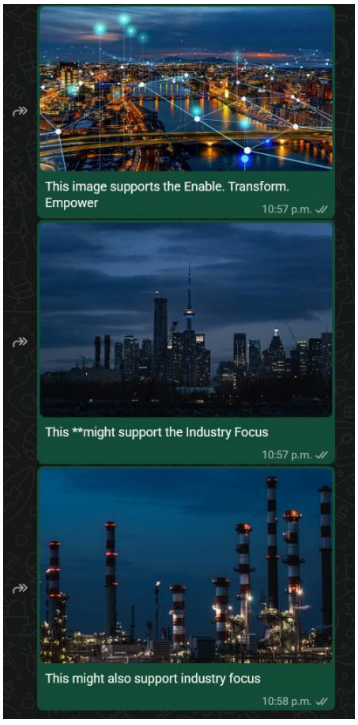

Below is the final presentation of **Our Company/About Us submenu (Highlighted in Red)**

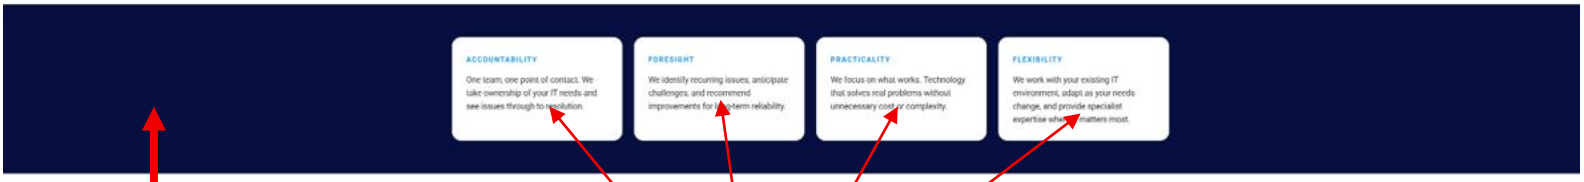

The text here cannot be read. This is because of the bright colours of the background photos. The photos that need to be inserted in this section are below. Once they are inserted, a decision will be made if the text is not visible to change the font colour or otherwise.

See below photos earlier shared on WhatsApp.

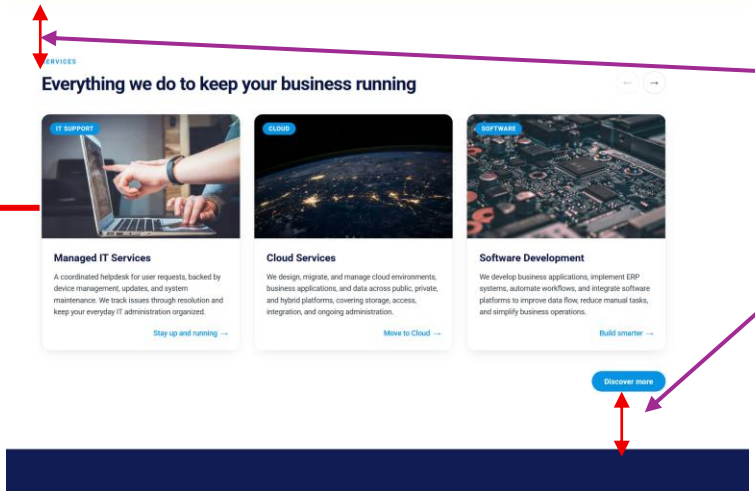

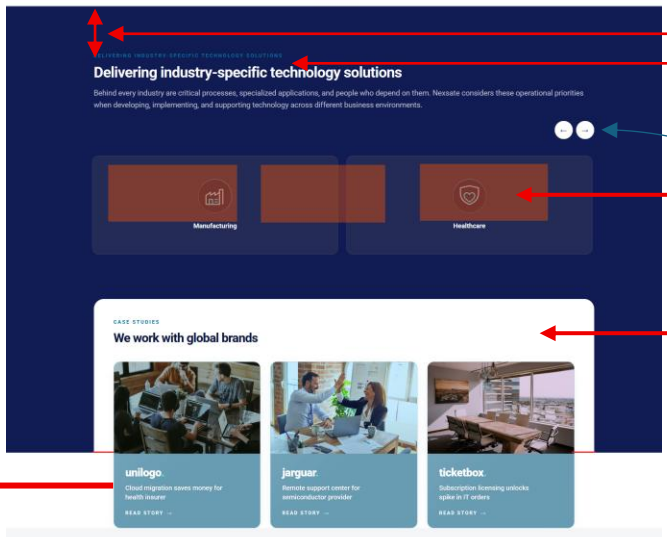

Remove the blue background.

Refer to https://aws.amazon.com/solutions/case-studies/ for the colour and behaviour of these containers. The text (content remains the same).

Space management: Leave just adequate space. Not too big and not too small.

Line spacing needed

We can list three industries on the landing page and the other three should be visible when you scroll to the **right**.

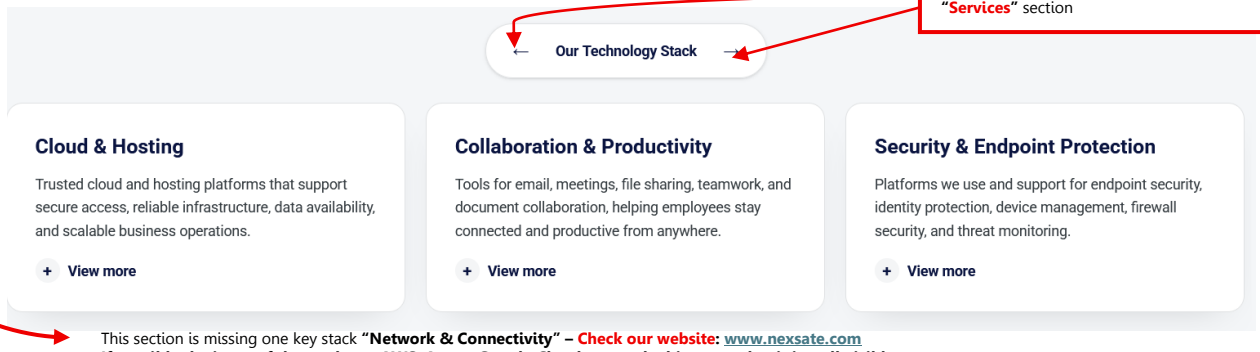

Remove the white background to retain the blue background.

THE TECHNOLOGIES WE USE

Using Trusted Technology to Solve Your IT Challenges

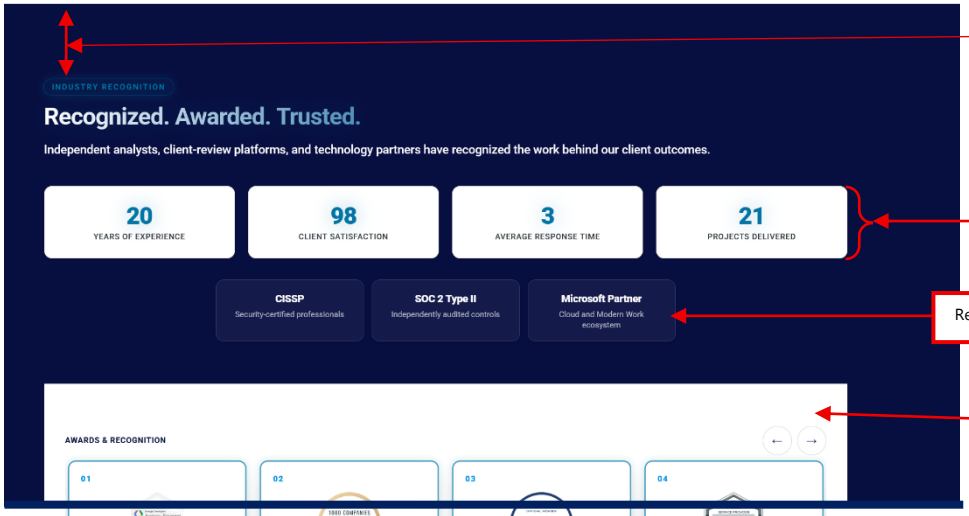

Nexsate uses proven platforms and technology partners to deliver reliable support, stronger security, better visibility, and smoother day-to-day IT performance.

Animate like the **"Discover More"** button on the **"Services"** section

This section is missing one key stack **"Network & Connectivity" – Check our website: www.nexsate.com**
If possible the icons of the stack e.g. AWS, Azure, Google Cloud etc can be bigger so that it is well visible.

Space management required

No white background, no animation needed.

Retain this one the way it is. It is ok.

No white background, no

Refer to https://aws.amazon.com/solutions/case-studies/ for the colour and behaviour/animation of these containers. The text (content remains the same).

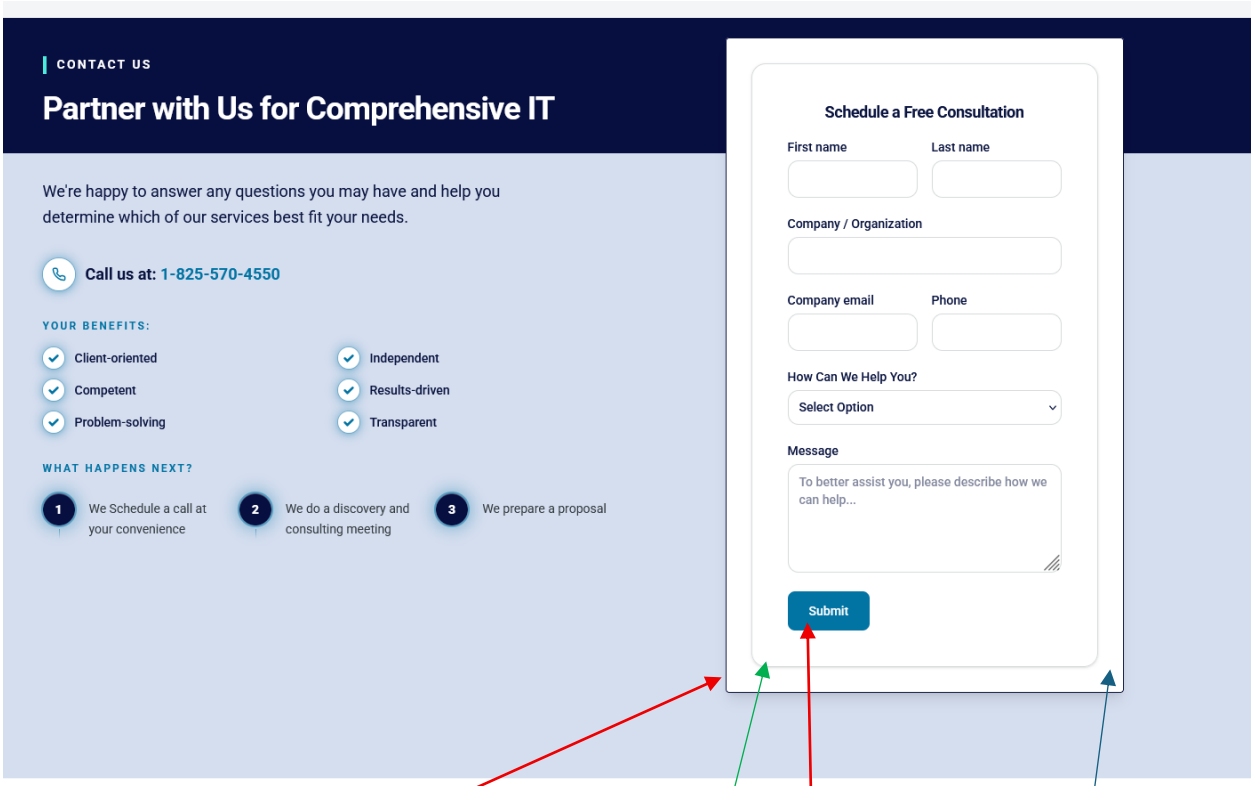

The idea is to have them look like they are floating on the page.

PARTNERS

Great partnerships with proven results

Intentional spacing

The form needs to be a slightly larger. Not excessively large but slightly like half of the page.

Need to remove the white background

Retain this outline only, no animation required

Animate like the **"Discover More"** button on the **"Services"** section
